News

We have been lucky with the weather this week and took the opportunity to spend time in the fresh air. Art was outside using the nature surrounding us and students sat in the shade with a picnic snack and lunch. We spent time looking at Singapore on the map and discussed the importance of our “Parks and Green Spaces.”

This week in Foundation 1:

In Maths, students matched, sorted and recognised notes, whilst other students worked on fractions and multiplication for their ILP targets.

In Art, we used recycled newspaper to make trees, and spent time outside with leaves and sand-being both a sensory experience and an important part of our unit on Environment and the natural beauty that surrounds us.

In Science and Sustainability, students learnt how they can use recycled materials to learn about the effects of mixing baking soda, vinegar and water. They were fascinated with the “Errupting Volcano.” We discussed how recycled materials can be used to make objects of fun and learning.

In English, students are continually impressing us with their independent journal writing and their commitment to learning weekly spelling words.

Sustainability and Environment:

Our weekly topic is “Nature is all around us.” Students were introduced to when and how we use our natural areas as well as the impact of human activities on these areas. They were shown different images of nature and as a group, discussed the names of these areas and what we can do in them.
### PE, Aquatics and Movement

In Dance, students worked hard and conscientiously with Ms. Gloria on choreographed movement sequences for their end of year performance. Ms. Esther engaged the students in Drama with mime and movement, incorporating characters being used in their end of year show.
